

HMS Software

Specializing in enterprise timesheet and enterprise project management systems since 1984

HMS Software, a division of Heuristic Management Systems Inc., is a wholly Canadian-owned company headquartered in Montreal with additional offices in Toronto, Canada. HMS was formed in 1984 to service the needs of organizations seeking enterprise project and enterprise timesheet systems. The company is known internationally as a source of project management and timesheet expertise. HMS is committed to the efficiency of its clients.

HMS is the publisher and the developer of *TimeControl*[®], a highly flexible multi-purpose timesheet system designed to service the needs of many aspects of an organization simultaneously. The TimeControl timesheet is able to support requirements from Finance, Human Resources, Payroll and Project Management at the same time where a single timesheet interface for entry and a single source of auditable timesheet data can be used for these multiple purposes at the same time. TimeControl is available both as a subscription online and for purchase for an on-premise deployment.

HMS's expertise includes both enterprise system development and implementation and integration services. From our modest beginnings deploying project management systems, we have focused on applying the most skilled and knowledgeable technical staff to the challenges we have taken on. We have worked with organizations as small as 20 employees to organizations with hundreds of thousands of employees.

HMS has had experience with many of the industry's most popular project management and project cost control systems. HMS is a certified Microsoft partner with Microsoft's Enterprise Project and Portfolio Management competency. HMS was recognized by Microsoft as a First to Market partner for its work integrating TimeControl and Microsoft Project Server. HMS is an Oracle Gold Partner thanks to our work integrating TimeControl with Oracle-Primavera as well as numerous other Oracle Technologies. We also have partnered with Deltek, BrightWork, InEight, ARES PRISM and others.

HMS Software's client list reads like a who's who of business. It includes Aegion, CANAM, CAE, the City of Montreal, Electromotive Diesel, EXFO, Foster Wheeler, Kelly Services, the Government of Quebec, Pontoon Solutions, Reebok-CCM, Rolls Royce, Sandoz, SEFA, Volvo Novabus, Zoetis, and hundreds of others.

HMS Software Overview

Skills

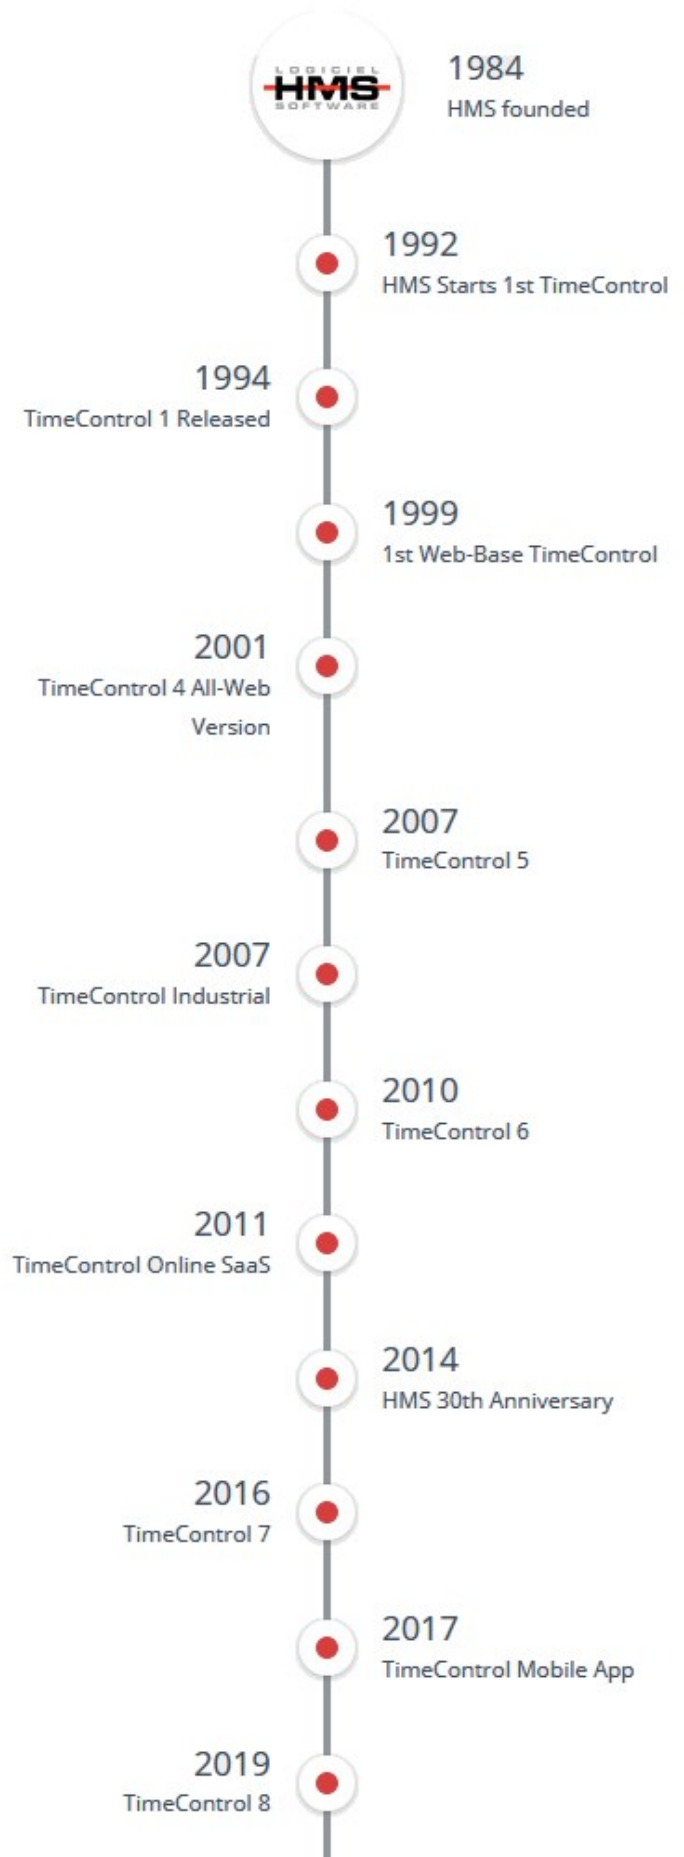

HMS started as a supplier of Enterprise Project Management and Enterprise Timesheet systems and then shifted to being a publisher of TimeControl in 1994. That focus ensured that our expertise in project control and project finance systems was extensive and had us establish skills in enterprise system development and design, process and documentation, and integration with other systems.

Experience

HMS Software's clients have all been mid to large sized organizations in both the private and public sectors. Our system deployments have been for organizations as small as 50 employees and as large as hundreds of thousands of employees. Given TimeControl's superiority in project controls, HMS is often asked to integrate with a range of project management systems and we have developed our own expertise in project systems such as Microsoft Project, Project Server and Project Online, Oracle Primavera, Deltek's EPM suite, ARES PRISM, Ineight's HardDollar, JIRA, BrightWork, SharePoint and others. Our knowledge of how to create an integrated project and portfolio control and earned value environment system with such tools is extensive.

Our People

HMS places a high value on the expertise of our personnel at all levels. The senior management of HMS have been with the company since the 1980s. Other key personnel have worked with TimeControl in different capacities for 10 to 15 years. It is not unusual to see our staff sought after for speaking engagements in project management events around the world.

HMS Products and Services

TimeControl

HMS Software is the publisher of TimeControl[®], a multi-purpose timesheet system which is available around the world. TimeControl is designed to service multiple requirements at the same time. It is a task-based timesheet which can fulfill Project Management requirements and a financially auditable timesheet which fulfills the needs of Finance as well as Payroll, Human Resources and Government compliance requirements simultaneously all from a single timesheet entry.

TimeControl includes both a web interface and a free Mobile App.

INDUSTRIAL

TimeControl Industrial

TimeControl Industrial was designed for the challenges of field data collection in situations where labor, material, equipment and production values must be collected and tracked from the field and then shared with other internal systems such as Finance for payroll, billing, job costing or contractor management, with project management, estimating and other systems.

TimeControl Industrial improves project cost management, the billing cycle and managing production values. TimeControl Industrial includes both a web interface and a free Mobile App.

TimeControl Online

TimeControlOnline is a Timesheet as a Service system which lets you start enjoying the benefits of TimeControl instantly without having to purchase or configure servers, databases or having to maintain, upgrade, monitor or service the system throughout its lifetime. HMS Software's TimeControl technical staff take care of all the background architecture, technology, security and maintenance in our highly secure TimeControl.net environment.

Both TimeControl and TimeControl Industrial are available as a TimeControl Online subscription

You can subscribe to TimeControlOnline on a month-to-month basis or enjoy significant volume discounts by contracting for a year at a time. When you activate your TimeControlOnline subscription, HMS establishes a secure database of only your company's data which is isolated from the data of any other subscriber. We pre-populate the system with the most common settings, reports, filters and timesheet validation rules and turn it over to you for your immediate use.

HMS Software Projects

It's really nice to be able to find a time management solution from an expert who not only knows how to do it but delivers it with exceptional support behind it.

Stephen Nosek
Director
Global Corporate Systems, Pontoon

With TimeControl, our reports are within mere minutes, and we trust the information being reported is accurate.

Chris Towne
Director of Finance, Entegrus

We have been very satisfied with TimeControl and the level of support provided by HMS Software. We highly recommend it.

Denyse Laundry
Manager, Corporate Services
Otonabee Region Conservation Authority

HMS has provided great support which has felt more like a partnership than a help desk. I recommend TimeControl to anyone who is needing a timesheet system that has the flexibility and capability of linking with project management software as well as providing HR functionality.

Mark Simpson
Project Manager
RN Engineering INC

We have used TimeControl for more than 20 years to capture the efforts of our R&D team in multiple sites and for other groups. It is my pleasure to recommend TimeControl.

Andre Richard
Director of R&D
EXFO
