# The Matrix Approval Process<sup>™</sup>

Link with both Primavera Pro and Primavera EPPM TimeControl includes both a database-to-database link and a Web Services link to both Primavera EPPM and Primavera Professional.

## <u>Auditable Historical data</u>

TimeControl includes historical data on all timesheet data regardless of what changes or deletions were made in the planning system. This means that if a task is deleted or moved, the actuals are not changed

Track controllable edits to posted timesheet data TimeControl allows audited Debit/Credit changes to previous timesheets which are tracked as changes to the original timesheet

## <u>Automated business validation rules</u>

TimeControl includes unlimited automated validation Rules which allows an organization to define what makes an acceptable timesheet. This can include simple rules such as "no more than 24 hours per day" or complex rules such as "no overtime unless you are a wage employee and have done at least 8 hours of regular time today".

## Unlimited Rates

TimeControl allows an unlimited number of rates per employee. Each rate maintains nine values. Two of these values are typically used for internal or actual cost vs. external or billing cost.

Project and Non-project time TimeControl can track both project items from the scheduling system and non-project items such as overhead types. There is no limit to the number of project or non-project items that can be included.

## Unlimited user-defined fields

TimeControl allows an unlimited number of user defined fields to be added to any table (such as the employee list or task items).

#### Multilingual

TimeControl includes a multi-lingual client which includes many languages by default and a module to add your own language translations.

Expense Reporting TimeControl tracks non-labor entries such as expense reports

## 

**DCAA Compliance** TimeControl is DCAA (Defense Contract Audit Agency) compliant

Sarbanes-Oxley Compliance TimeControl is a powerful tool for Sarbanes-Oxley compliance in order to conform to SEC rules for internal software development and deployment for any company publicly traded in the US

##

#### Matrix Approvals

TimeControl supports HMS Software's unique "Matrix Approval Process for Labor Actuals™" which allows timesheet data to be approved by both line or resource managers and projects managers

**Resource assignment options** TimeControl supports individual, role and group resource identification. Timesheet data can be sent for an individual's resource code group multiple employees into one generic resource code

Hierarchical display for high data volume TimeControl displays projects, rates and tasks in a hierarchical tree format. This allows support of a tremendous volume of data

## Link to invoicing

TimeControl's financial-quality data is ideally suited for invoicing and TimeControl's Link module allows output to be sent to virtually any billing system or the billing module of any major Finance system

##
